DETAILED ACTION

Drawings

1. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the “the through holes in each fitting section in the bottom portion” must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Claim Objections

Claims 4 and 5 are objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim cannot depend from another multiple dependent claim. Claims 4 and 5 both have depend from claim 2 which is a multiple dependent claim. See MPEP § 608.01(n). Accordingly, the claims 4 and 5 not been further treated on the merits.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Art Unit: 3727

3. Claims 1-5 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claim 1 recites the limitation "corresponding engagement block" in line 9 of the claim. There is insufficient antecedent basis for this limitation in the claim. Claim 2 recites the limitation "each fitting section formed in the bottom portion" in lines 3 and 4 of the claim. There is insufficient antecedent basis for this limitation in the claim. It is unclear what is being claimed. The remaining claims are included since they stem from rejected claims.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by Foy. Regarding claim 1, as it is best understood, see Figs. 1-9 where the folding container is shown. Each of the side walls have engagement frame sections formed thereon for mutually engaging the side walls. See Fig. 3, where 90 is the locking block on which the bottom of a folding container can be fitted, the side walls each have an underside with a recess into which one of 90 can fit, the engagement frame sections mutually engage the side walls and to engage the side walls with the bottom portion. Regarding claim 2, as it is best understood, see Fig. 3 where the locking block 90 goes

through the through hole in the bottom of the side wall. Regarding claim 3, as it is best understood, the engagement frame sections fit within the base.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Boucher-Giles, Furtner, and Jacques et al are all cited for teaching folding containers.
7. In order to reduce pendency and avoid potential delays, Group 3720 is encouraging FAXing of responses in Office Actions directly into the Group at (703) 305-3579. This practice may be used for filing papers not requiring a fee. It may also be used for filing papers which require a fee by Applicants who authorize charges to a PTO deposit account. Please identify the examiner and art unit at the top of your cover sheet. Papers submitted via FAX into Group 3720 will be promptly forwarded to the examiner.
